

The Anthony School

Technology Responsible Use Policy

The Purpose of the Responsible Use Policy is to set forth the guidelines and expectations for the responsible use of technology by students, staff and teachers in order to provide a safe, appropriate and effective learning environment for all The Anthony School. The use of technology in the classroom is more than an attempt to supplement our curriculum. Instead, our vision is to provide teachers and students a tool that will enhance and revolutionize the way teachers facilitate the learning process, and the way students not only gain information, but also learn how to analyze and reflect on that information. Our goal is to give students the tools necessary to become responsible and ethical digital citizens, to guide them in their quest to become members of a global networking community, and to provide assistance and support as they learn how to interact socially with respect, integrity, empathy and compassion.

A goal for The Anthony School is to individualize instruction, learner outcomes, and student goals based on each child's unique learning style and potential. The use of technology helps teachers create a classroom setting that not only promotes differentiated instruction, but also provides opportunities for collaboration, creativity and communication.

Learning to use technology responsibly will allow The Anthony School to enhance the philosophies and traditions on which our school is built, with the tools necessary for students to become independent and excited learners.

For the Individuals Using Technology

1. We expect the exercise of personal integrity and responsibility.
2. We expect students to master certain social-emotional skills in order to maintain ethical use of such technology.
3. We expect students to avoid using the technology to participate in activities that interfere with the learning process.

For the School

1. The Anthony School will provide a social-emotional curriculum based on stages of human development to guide the implementation of our technology program and stay true to our mission statement.
2. Our goals are (a) to provide access to educational tools, resources, and communication and (b) to encourage innovation and collaboration.
3. Our policies are intended to promote the most effective, safe, productive, and instructionally sound uses of these tools.
